City Centre. Residential developm	nent would bring numerous benefit	ts, inclu	iding an opportunity to enhance the		
built environment of this part of Ber Street, reinstating the historic sense of enclosure, and potentially acting as					
a catalyst for wider regeneration.	Future residents would have easy	acces	s on foot to the extensive range of		
jobs and services that Norwich pro	ovides, as well as access to a rang	ge of su	stainable transport options,		
reducing pollution and contribution to climate change. Development could provide a mix of market and					
affordable units, with a range of sizes, to help meet local need.					

Local Green Space

If you are proposed a site to be designated as Local Green Space please complete the following questions. These questions do not need to be completed if you are not proposing a site as Local Green Space. Please consult the guidance notes for an explanation of Local Green Space Designations.

6a. Which community would the site serve and how would the designation of the site benefit that community.

6b. Please describe why you consider the site to be of particular local significance e.g. recreational value, tranquillity or richness in wildlife.

Site Features and Constraints

Are there any features of the site or limitations that may constrain development on this site (please give details)?

7a. Site Access: Is there a current means of access to the site from the public highway, does this access need to be improved before development can take place and are there any public rights of way that cross or adjoin the site?

There are a number of existing accesses onto Ber Street and Mariners Lane, which can be used to serve any future development. A scheme of highways improvements on Ber Street, including footway realignment, was previously agreed under planning permission 08/00490/F.

7b. Topography: Are there any slopes or significant changes of in levels that could affect the development of the site?

The site slopes significantly downwards from Ber Street to the north-east. The land on the west side of Ber Street is relatively level.

7c. Ground Conditions: Are ground conditions on the site stable? Are there potential ground contamination issues?

Part of the site has previously been used as a Petrol Filling Station, and remediation works are therefore likely to be required. There is also a history of Chalk Workings in the area, which would require further investigation.

7d. Flood Risk: Is the site liable to river, ground water or surface water flooding and if so what is the nature, source and frequency of the flooding?

The site falls within Flood Zone 1, where there is a low probability of flooding.

7e. Legal Issues: Is there land in third party ownership, or access rights, which must be acquired to develop the site, do any restrictive covenants exist, are there any existing tenancies?

There are a number of existing tenancies, all of which are due to expire by December 2020.

7f. Environmental Issues: Is the site located next to a watercourse or mature woodland, are there any significant trees or hedgerows crossing or bordering the site are there any known features of ecological or geological importance on or adjacent to the site?						
The eastern boundary abuts a linear g mature trees and hedgerows within the watercourses, mature woodland, nor a importance on or adjacent to the site.	e site, around the Ma	riners Lane car park.	There are no			
7g. Heritage Issues: Are there any listed buildings, Conservation Areas, Historic Parklands or Schedules Monuments on the site or nearby? If so, how might the						
The site falls within the Ber Street Conservation Area. There are no Listed Buildings within the site, but to the north of the site are the Grade II Listed Remains of the Church of St Bartholomew. Along Ber Street are a variety of Listed Buildings including 81, 83, 89, 91, 103, 101, 121, 123, the Jolly Butchers, and 139 Ber Street. Also, in the vicinity is the Convent of Notre Dame, a Grade II Listed Building.						
	7h. Neighbouring Uses: What are the neighbouring uses and will either the proposed use or neighbouring uses have any implications?					
There are a mix of uses, including residential, commercial and Notre Dame High School. Residential development in this location has previously been assessed as acceptable.						
7i. Existing uses and Buildings: are there any existing buildings or uses that need to be relocated before the site can be developed.						
There are existing leases, all of which expire by December 2020; the businesses operating from the existing buildings have already identified preferred relocation options.						
7j. Other: (please specify):

Other Relevant Information

13. Please use the space below to for additional information or further explanations on any of the topics covered in this form

The site is considered to be entirely deliverable, and capable of making a significant contribution towards satisfying the Councils' housing needs during the period to 2036, in a highly sustainable City Centre location.

In accordance with the National Planning Policy Framework's (NPPF) definition of 'deliverable', set out in footnote 11 to paragraph 47, the site represents a suitable location for development, is available, is achievable with a realistic prospect of housing being delivered on the site, and is viable. These points are addressed in further detail below.

Assessment of Deliverability

Suitable

The site occupies a highly sustainable location within Norwich City Centre, part of which is already allocated for residential development under reference CC2 in the Adopted Development Plan, and has previously benefitted from planning permission for residential development comprising 151 dwellings, under planning application reference 08/00940/F. Whilst that consent has subsequently lapsed, the site remains entirely suitable for residential development. There have been no material changes to the site or its surroundings that would alter the Council's previous conclusions, set out in the Committee Report for application 08/00940/F, that residential development in this location would result in "redevelopment of a 'brownfield' site in a sustainable location... which makes efficient use of land."

Planning permission 08/00940/F was able to successfully demonstrate that high-density residential development, at over 80dph, could be accommodated on the site without detriment to local townscape or principal long-distance views from the opposite side of the river valley.

The site is in an area identified within Norwich City Council's 'South City Centre Vision and Investment Plan, 2013' as suffering from a weak townscape that is at odds with the historic character of the area. Development would assist in reinstating a sense of enclosure along Ber Street, and as stated in the previous application's Committee Report, could "act as a catalyst for regeneration and promote vitality in the Ber Street area" and "result in the rebuilding of part of a fragmented section of the Ber Street frontage". Development would therefore have a positive impact on the character and appearance of the area, and on the nearby Heritage Assets, which include a number of Listed Buildings on Ber Street.

The previous consent also established that the site could be developed without unacceptable impacts on nearby residential properties, and with the identified highway works would have no adverse impacts on highway safety or traffic flow. There are no known infrastructure constraints, and a drainage strategy can be devised to ensure that no increased risks of flooding occur.

Further assessment of ground stability and ground conditions will be undertaken prior to the submission of any planning application, given part of the site's history as a petrol filling station and the potential for former chalk workings to exist in proximity to the site. The investigations undertaken in support of the 2008 planning application were accepted by the Environment Agency and the Local Planning Authority to provide confidence that appropriate mitigation could be provided.

The earlier planning permission also confirmed that the site can be developed for residential purposes without any detriment to biodiversity or geodiversity issues. There are no sites of ecological significance or interest in the vicinity of the site. Whilst it is unlikely that the site itself would provide on-site open space, due to its constrained size and nature, the previous permission established an acceptable alternative, through the enhancement and/or augmentation of existing provision in the locality.

Whilst the site is currently, in part, used for employment purposes, it is not located within a designated employment area, and the businesses which currently occupy the site intend to relocate to alternative premises within the city. For example, the current motorbike dealership is currently progressing pre-application proposals for a new location close by.

It is therefore clear that the site remains entirely suitable for residential development of approximately 150 dwellings.

Available

The site was previously put forward for development in Norwich City Council's Site Allocations and Site-Specific Policies Plan, but part was subsequently withdrawn at the request of the landowner, who had concerns that the site would not be available for residential development during the plan period i.e. before 2026. At the time, the site was fully tenanted, and the car parks were on long leases to the NHS who occupied Elliott House adjacent. Consequently, the longer-term future of the site for commercial purposes appeared relatively secure.

Circumstances have subsequently changed; not only does the latest consultation seek sites to deliver growth over an extended period, to 2036, but all leases on the site have either ended or are coming to an end. The NHS have terminated their lease of the car parks as Elliott House has been redeveloped for residential purposes. The gym use of No. 106 ceased in summer 2017, and whilst replacement short-term tenants have been found, these do not offer a long-term commercial future for the building or the site. As described above, the motorbike dealership has a preferred site for

relocation. The whole site will become available for development from January 2021, when all current leases will have expired.

Achievable

It is considered that residential redevelopment of the site within the first five years of the Greater Norwich Local Plan is entirely achievable. As detailed above, all leases are due to expire by December 2020, and the site will therefore be available for redevelopment in its entirety from January 2021. There is more than sufficient time in the meantime for a new planning application to be drawn up, and consented, prior to the expiration of the leases. There are no known constraints to delivery of the site in terms of infrastructure requirements etc, and as detailed below, residential development of the approximate quantum previously consented is considered viable at this stage.

The landowner is committed to the delivery of housing on the site.

Viable

Development of the site for residential purposes is, at this stage, considered viable, taking into consideration the various policy requirements in relation to matters such as affordable housing provision and CIL contributions. Further evidence on viability can be provided on a strictly private and confidential basis, should this be deemed necessary.

Summary

As outlined above, the site is suitable, available, achievable and viable, and is deliverable within the first five years of the Greater Norwich Local Plan period. On this basis, the site should be taken forward as an allocation for residential development of approximately 150 dwellings in the emerging Local Plan, as it would represent sustainable development in all three dimensions.

Economically, the site represents the right type of land in the right place at the right time, to enable further residential development in a highly accessible Town Centre location. Additional housing will ensure that the employment growth which Greater Norwich has experienced since 2011 is properly supported. Future residents would have easy access to the extensive range of jobs and services which Norwich offers. Socially, development of the site will assist in the creation of a high quality built environment, and will offer homes in an established community with highly accessible local services. In environmental terms, development will enhance the built environment of this part of Ber Street, and the close proximity of the site to employment and services means there is significant opportunity for sustainable transport, reducing potential for pollution and contribution to climate change.

The GNLP Site Proposals consultation document recognises that only a limited number of brownfield sites have been put forward for residential development through the previous Call for Sites process, and encourages the submission of additional brownfield sites, such as this one, recognising that this type of site offers maximum opportunity for sustainable development. Residential development of the land at Ber Street would make a significant contribution to enabling the delivery of the 1500 additional homes planned for Norwich in the period to 2036. The site has already been demonstrated to be entirely suitable for residential development, through the grant of full planning permission in 2011, and would enhance the character and appearance of this part of Ber Street. The site is available for development within the plan period, and there are no constraints that would threaten its delivery.
